

Problem:

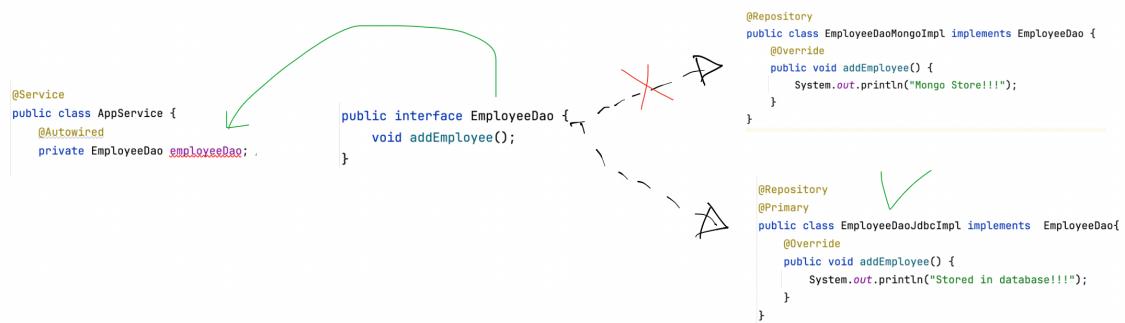

```

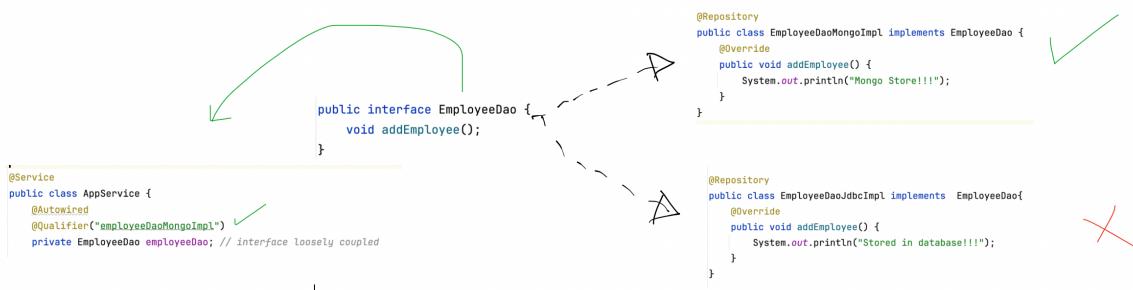

Field employeeDao in com.adobe.springdemo.service.AppService required a single bean, but 2 were found:
    - employeeDaoJdbcImpl:
    - employeeDaoMongoImpl:

```

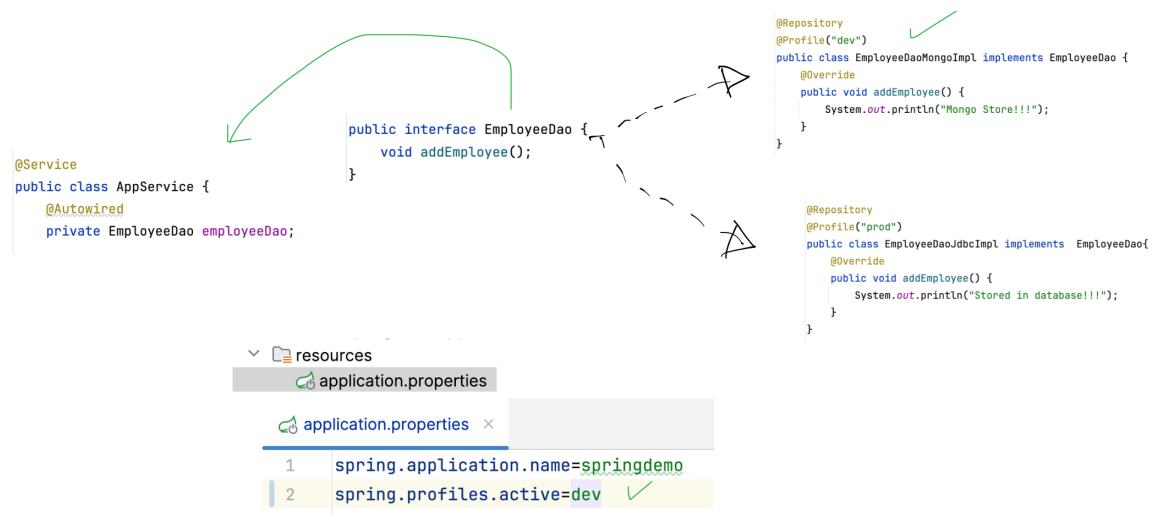

Solution 1: using @Primary

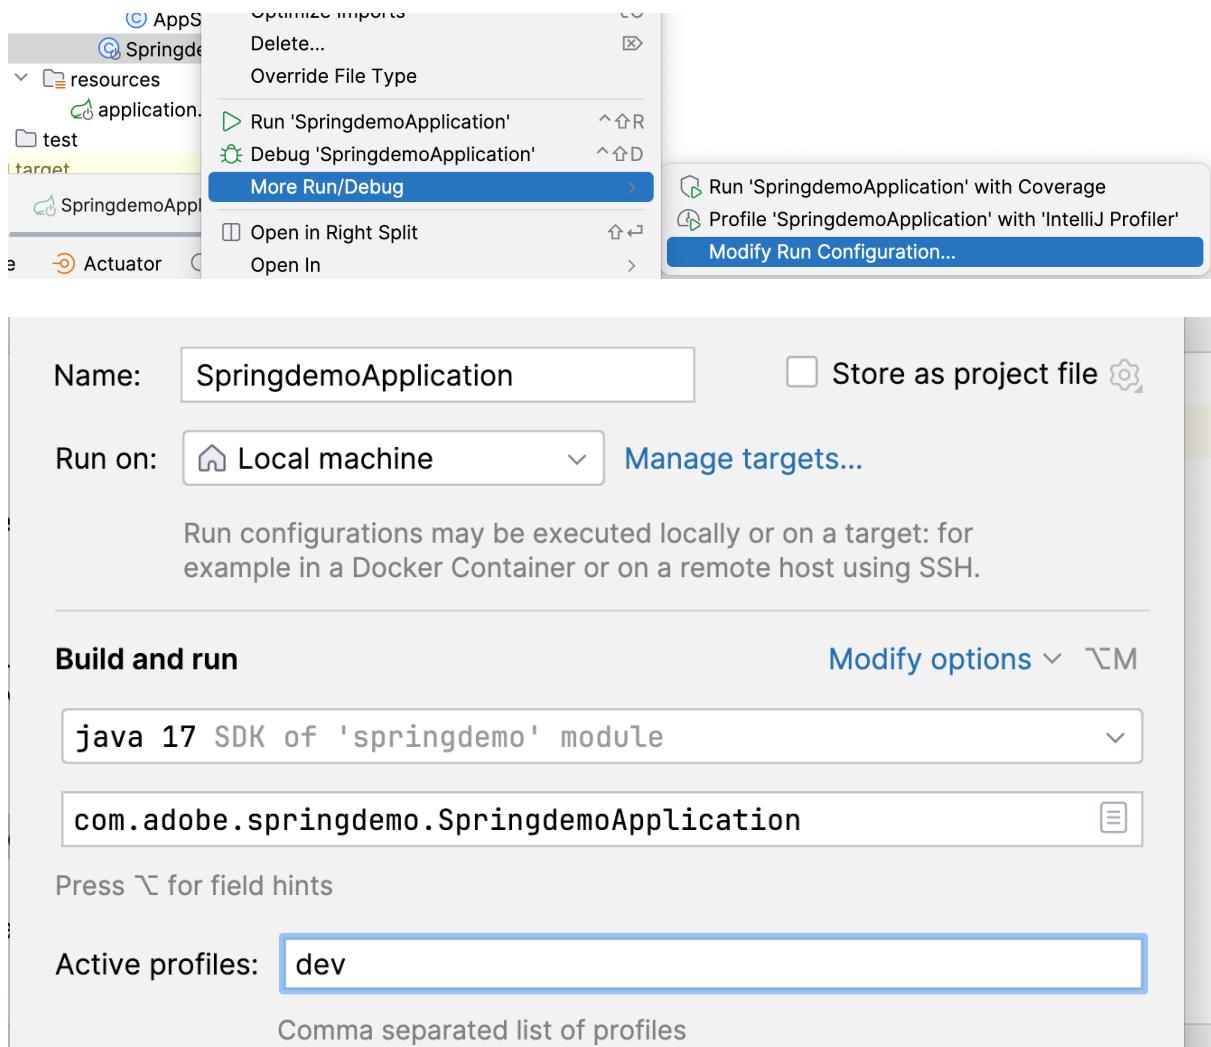

Solution 2: using @Qualifier

Solution 3: using @Profile

Command Line Arguments:

Solution 4: @ConditionalOnMissingBean

```

@Repository
public class EmployeeDaoJdbcImpl implements EmployeeDao{
    @Override
    public void addEmployee() { System.out.println("Stored in database!!!!"); }
}

@Repository
@ConditionalOnMissingBean(name="employeeDaoJdbcImpl")
public class EmployeeDaoMongoImpl implements EmployeeDao {
    @Override
    public void addEmployee() { System.out.println("Mongo Store!!!!"); }
}

```
